Vernia

JUB

SINCE 1910
JUB HOLLAND

Stworzyliśmy firmę Vernia jako naturalną kontynuację naszych pasji i szkółkarskich doświadczeń zdobytych w wielu krajach świata – Nowej Zelandii, USA, Holandii, Czechach i Polsce. Dzięki nim, a także doświadczeniom w handlu, wybieramy dla Państwa najciekawsze rośliny od najlepszych producentów. Znacnie nas z dostarczania najlepszej jakości drzew, krzewów, bylin i cebul.

Kolejny rok współpracujemy z firmą JUB o 114 - letniej szkółkarskiej, rodzinnej historii, sadzenia i hodowli roślin cebulowych. Jesteśmy jej wyłącznym partnerem handlowym w Polsce. Firma ta jest właścicielem wielu uznanych certyfikatów jakościowych jak MPS-A, NL- Greenlabel czy PlanetProof. Posiada w ofercie unikalne kolekcje których specjalnie wyselekcjonowane cebule m.i. Triumph czy Organic oprócz znakomitej jakości mają najwyższą odporność na choroby.

Ponieważ firma Vernia specjalizuje się w dostarczaniu roślin do miejsc zieleni publicznej, ogrodów, parków czy terenów inwestycyjnych, proponujemy ciekawe pomysły przeznaczone dla tych przestrzeni:

- zestawienie mieszanek cebul kwiatowych z odpowiednio dobranymi bylinami dające niezapomniane efekty kolorystyczne przez większość miesięcy w roku i co ważne szczególnie dzisiaj, w środowisku miejskim, bioróżnorodność.
- odpowiednio dobrane przez specjalistów, długo kwitnące kwiaty przyjazne m.i. dla pszczoł i motyli.
- ciekawe rozwiązania kolorystyczne dla roślinnych pokryć dachowych, trawników, terenów około rzecznych...
- dla odświeżenia projektów zawsze poszukiwane Nowości na sezon 2024/25 (na stronach 12-15)

Korzystając ze współpracy z firmą JUB, planujemy również wprowadzenie do naszej oferty usługi mechanicznego sadzenia cebul (patrz strony 132-137).

Zapraszam do przejrzania katalogu w którym znajdziemy inspiracje jak i szczegółowy, pełny jesienny asortyment. Jeśli interesuje Państwa katalog wiosenny, proszę o kontakt w tej sprawie.

To co bardzo ważne, zespół firmy Vernia służy radą i pomocą w wyborze roślin odpowiednich do projektu.

Z pozdrowieniami,

w imieniu firmy VERNIA

Martin Fokt

Trends for 2024/2025

All about JUB

SINCE 1910

The knowledge and expertise that has been passed down through four generations, is the key to the success of our family business. What began in 1910 as Jac. Uittenbogaard is now an international operating flower bulb company, under the name JUB Holland. Within our company, all facets of the profession are covered. This is how we distinguish ourselves from other suppliers.

OUR LANDSCAPE TEAM

The landscape specialists for landscape architects, gardeners and public parks. More about our team (contact details) can be found on page 143 of this catalogue.

They are happy to think along with you about your current and upcoming projects and provide advice on how to achieve the best results.

OWN NURSERY

The great thing about JUB Holland is that we are one of the few companies in the bulb sector that does everything themselves. We grow, we refine, we trade. This also characterizes our history.

We grow 49 varieties of tulips and 16 varieties of daffodils on 35 hectares of private land, all certified (MPS A and PlanetProof).

NEW VARIETIES

We love to pull our strengths with those of others. That's why we are part of Remarkable Tulips, a collective of seven flower bulb growers and exporters that works on the breeding and development of new tulip varieties.

These bulbs are of the very best quality and have a high resistance to diseases. Breeding requires patience, but the results are more than worth it: the most stunning and most exclusive tulips.

WE WORK WITH TOP DESIGNERS

We have a strong reputation to uphold with our products. The quality of our bulbs is our priority and we work with top designers for public green spaces and parks. We are always aware of the latest trends.

We meet tomorrow's demands for high-quality products that are produced and marketed with respect for people, society and the environment.

With regard to our famous bulb mixtures (eye-catchers and machine planting mixtures), we work closely with landscape architects who advise us and compose these mixtures with us.

CONCEPTUAL THINKING

Greening cities is an international trend in which JUB Holland plays an active role. We make and create total concepts. In fact, you could even call us a trendsetter.

in the 1980s we developed a planting machine which plants flower bulbs under grass at lightning speed. For more information about mechanical planting, see pages 132-135 of this catalog and on our website.

Our customers are municipalities, companies, park and recreation departments, gardeners, landscape architects and landscape companies in Europe, the United States and Canada.

JUB @ KEUKENHOF 2024

This year the design is entitled 'Indigo'. The naturalizing bulbs will set the blue tone while the mauve and lilac tones of the tulips and the moon yellow tones of the daffodils will provide depth and colour contrast. This way the enchanting blue comes into its own even more, like a night-blue sky with moon and stars.

Keukenhof 2024: 21 March - 12 May

JUB HOLLAND TRIAL FIELD

JUB has its own trial field with the entire JUB range (more than 800 varieties), mixtures, eye-catchers and much more. Everything can be seen from mid-March to the end of May.

The trial garden is open to all customers by appointment and offers an excellent opportunity to view, compare, admire and photograph the many species.

JUB & Sustainability

SUSTAINABLE PARTNER

Our company is a MPS-ABC, Florimark GTP, PlanetProof and SKAL certified Sustainable Supplier.

We also obtained the sustainability passport of NL-Greenlabel. MPS-ABC is more than just a certificate. It is a monitoring tool that allows us to push the right buttons to reduce our environmental impact.

Besides that our Florimark GTP certificate meets social, quality and environmental requirements and encourages cooperation in the chain.

Butterfly attracting alliums

WE TAKE CARE OF THE ENVIRONMENT

We are proud of our PlanetProof environmental certificate, which was developed in collaboration with various environmental organizations. By purchasing PlanetProof flower bulbs you stimulate sustainable flower bulb production and protect the environment! For JUB, sustainability also means:

- Use of as many organic products as possible in cultivation and organic fertilization
- Use of green energy
- Use of solar panels
- Circularity is central
- Reuse of materials and use of recycled materials
- New developments regarding the environment are closely monitored
- Attention to people, health, care and innovation
- Providing insight into the entire process from cultivation to delivery (plant passport)

SUSTAINABILITY AND COLLABORATION

PlanetProof bulbs

BIODIVERSITY

Biodiversity is a priority for JUB. The habitats of bees and butterflies have become increasingly smaller while the bee and butterfly colonies are unmissable for biodiversity in our ecosystem.

Flower bulbs make an important contribution to biodiversity, they are a crucial source of nectar and pollen, particularly in early spring, when not many other plants are flowering to provide the much needed varied meal.

See our bee and butterfly logos on the various packages to see which bulbs are suitable and attractive to bees and butterflies.

NATURE AT OUR NURSERY

Sustainability and biodiversity means taking into account what happens at the nursery. The larks in the air, the hares that run between the beds and the large spawning carps that return annually in the canals.

The edges of the fields are sown with a flower mixture that both houses and provides nectar for bees and insects. We sow oat after the bulbs have been planted: an environmentally friendly way to prevent weeds from growing between the emerging bulbs.

A whole package of measures for an increasingly sustainable nursery. Good for humans, animals and of course the bulbs.

CATALOGUE CO2-NEUTRAL PRINTED ON FSC PAPER

This new JUB Holland catalog is 100% CO2 Neutral printed on paper with the FSC quality mark. For the catalogue, JUB Holland has fully compensated the CO2 emissions from printing the catalog with an investment in nature conservation. The investment of this CO2 compensation project goes to 'The PROJECT TOGO natural forest afforestation' in Africa.

What does CO2 neutral mean? This is what CO2 neutral means a production process has no influence on the balance in the atmosphere. The CO2 impact of a process is calculated and then compensated by investing in nature restoration or conservation.

Additional topics on our website

There are many interesting topics that unfortunately cannot all be included in this catalogue. Therefore, you can use these practical links to the topics on the JUB Holland website by scanning the QR code (phone camera) or by clicking on the text links in the digital PDF.

FLOWER BULBS IN POTS AND TUBS

Spring-flowering bulbs beautify streets and squares in villages and cities. They add colour to early spring. Colourful rows of tubs and bowls with spring bulbs brighten residential and shopping streets, squares and shopping centres.

OUR TOP 25 BEST BULBS

JUB supplies hundreds of varieties of spring-flowering bulbs for gardens and parks. We highlight the 25 very best in this brochure: very strong species, most reliably recurring or naturalising, which give every garden a huge boost! Would you also like to participate in this flyer with your own logo and address?

FLOWER BULBS ON ROOF GARDENS

Lush roof gardens are adorning more and more roofs. Beautiful borders of perennials combined with waving ornamental grasses. Together with the supporting structure of trees, hedges and shrubs, they form a beautiful unity. Flower bulbs on the roof are strategic eye-catchers in spring and summer.

FLOWER BULBS FOR A PICKING GARDEN

Whether it concerns 10m² or 100m², creating a cutting garden is always possible. Commercial or for personal use. Make a plan. What colours, types and flowering times do you have in mind? For a successful cutting garden, it is important to select the right varieties. Not every daffodil or tulip is suitable. We are happy to advise you.

FLOWER BULBS COMBINED WITH PERENNIALS

A combination of flower bulbs with perennials creates a varying palette of flowering times, colours and scents. We can advise you on the best combinations. Bulbs and perennials reinforce each other.

JUB Flowerdesigner App

WITH THIS UNIQUE APP SPRING COMES TO LIFE VIRTUALLY

There is the unique option to use the Flowerdesigner App. See what the planting bed in a park, roadside or other location will look like when the spring bulbs to be planted (mechanically) are in full bloom. The App offers many options in terms of types and many options in terms of bulbs/m² and making mixtures.

With this App, JUB specialists can determine on location what the most beautiful and best spring bulbs are for municipal or provincial roadsides and borders in parks and public green areas. Mixtures, individual species; everything is possible. The bulbs can be virtually planted and blossomed on photos of the existing situation.

Spring comes to life through the visualizations on the iPad. It is possible to share the design with your customers. The JUB specialists are happy to advise you about the many possibilities and applications of this App.

CONVENIENCE AND MANY OPTIONS

With this app it will be easier to get an impression of the many possibilities with flower bulbs. Do you have an area that you are considering to enhance by planting bulbs? Contact your JUB specialist and discuss the options. Read more about the App on the JUB website via the QR code shown here.

Bulbs and biodiversity

FOR BEES AND BUTTERFLIES

Biodiversity is a term we use to denote the richness of nature. It is about the great diversity of animals, plants, habitats and genes.

Biodiversity, through its interaction with environmental factors, creates ecosystems in which organisms, such as humans, can live.

The habitats of bees and butterflies have become smaller and smaller and have also become further and further apart. Flowery roadsides, gardens and public green spaces can form an important link between their habitats.

SPECIAL BEE MIXTURES

The Dutch Beekeepers Association (NBV) and Buglife are committed to improving the living conditions of butterflies and bees. Together with the NBV, we have developed special mixtures that are both bee and butterfly friendly.

WHICH BULBS FOR BEES AND BUTTERFLIES?

The bulbs which we use in our bee- and butterfly mixtures all belong in the top 10:

- *Nectaroscordum siculum*
- *Allium*
- *Crocus* (botanical and large flowering)
- *Chionodoxa luciliae* and *sardensis*
- *Scilla siberica*
- *Muscari armeniacum* and *aucherii* varieties
- *Galanthus*
- *Hyacinthoides non-scripta*
- *Eranthis*
- Botanical tulips
- *Anemone blanda* and *nemorosa*
- *Ornithogalum umbellatum*
- *Leucojum aestivum*

Inspiration

The Vibrant Verge

WHY THIS CONCEPT?

Biodiversity is increasingly important in the urban environment. In addition, much attention is paid to ecological management and development of wildflower vegetation. The Vibrant Verge concept has been developed to increase biodiversity and guarantee a long flowering period.

Within this concept, the strengths of annual, biennial and perennial (indigenous) seed mixtures are combined with a tailor-made bulb mixture. This ensures vegetation with a long flowering time, increased biodiversity, extensive, ecological maintenance and the seasonal experience gets enhanced.

Our sales team is happy to tell you more about the concept. The Vibrant Verge is a partnership of JUB Holland and **Pictorial Meadows LTD**. For more information: www.thevibrantverge.co.uk

Climate adaptive planting

APPLICATIONS OF BULBS UNDER DRY CONDITIONS. BETWEEN GRASSES AND PRAIRIE PLANTS

A prairie garden often has a low-maintenance planting system, with a natural balance between plants.

The combinations of strong perennials and ornamental grasses give a completely different picture in color and structure five to six times a year. The image is attractive all year round.

Because many prairie plants start late, bulbous plants are used for colour in the spring.

BULBS FOR DRY LOCATIONS:

- Allium
- Camassia
- Ornithogalum
- Iris hollandica
- Botanical tulips
- Botanical narcissi

Allium His Excellency

Tulip linifolia

Ornithogalum

Allium Early Emperor

Iris holl. Red Ember

Allium sphaerocephalon

APPLICATIONS OF BULBS UNDER WET CONDITIONS. IN WET GARDENS AND PUBLIC GREEN SPACES (INCLUDING WADIS)

A whole new form of specially designed wet locations are so-called wadis. A wadi actually works just like a floodplain or a river bed. It is a designated place that is occasionally completely flooded. At this location, the water can slowly sink in and is then slowly transported away to the ground and surface water. In this way it protects the sewage system.

A wadi system is designed to collect a certain volume of water. The wadi is usually calculated for a maximum water depth of around 30 to 40 cm and is then under water for a short period, usually no more than 24 hours. Outside these inundation periods, the wadi is often dry for a long time.

BULBS FOR WET LOCATIONS:

- *Camassia cusickii*, *leichtlinii* & *quamash*
- *Nectaroscordum siculum*
- *Leucojum aestivum* 'Gravetye Giant'
- *Fritillaria meleagris*
- *Narcissus jonquilla* hybrids
- *Galanthus nivalis*
- *Muscari azureum* & *botryoides*

Nectaroscordum siculum

Camassia quamash

Narc. Golden Echo

Muscari azureum

Galanthus nivalis

Leucojum aestivum 'Gravetye Giant'

Parks & Naturalising bulbs

NATURALISING AND LOW MAINTENANCE BULBS FOR WOODLAND AREAS, PARKS AND BORDERS

Naturalising bulbs, many of them being native varieties, can be found in this section. Our naturalising bulbs are all nursery grown and not collected from the wild! In general, they require minimal maintenance and many of them will grow in (semi-) shady locations.

Woodlands & parks

MOST POPULAR NATURALISING BULBS

The most popular naturalising bulbs in woodlands are undoubtedly snowdrops, wood anemones and English bluebells. Wood anemone (*Anemone nemorosa*) is native to almost the whole of Britain on various types of soils and habitats. The rhizomes will spread steadily if conditions are right, around or under trees.

Very spectacular are the bluebell woods where millions of violet-blue flowers spread their sweet scent, but bluebells can also be found in more open spaces. Galanthus (snowdrops) are usually the first flowers to appear in winter. The discussion whether they need to be planted as dry bulbs or 'in the green' will probably never end. At JUB we always advise to plant snowdrops in late summer or early Autumn as fresh dry bulbs for the best result.

Fritillaria meleagris

Leucojum aestivum

Galanthus nivalis

Crocus tommasinianus

Anemone nemorosa

Hyacinthoides non-scripta

Anemone ranunculoides

READY TO USE MIXTURES

When you want to get started with naturalising bulbs, we offer in this catalogue a very wide selection of true species from reliable, often small-scale nurseries. For those who find it difficult to choose varieties which combine well, there are beautiful ready-to-use mixtures available.

Those mixtures provide colour for months and we are happy to advise whether your preferred mixture is also suitable for the particular project. This depends on factors such as mowing, pruning, light and type of soil. More and more clients are asking for bespoke mixtures, because they want something special: a mixture or planting plan that is completely geared to the location with a theme that matches the specific project. The specialists can advise you.

Naturalising bulbs

SINGLE SNOWDROPS - GALANTHUS NIVALIS - P. 114

Galanthus likes moist soil under deciduous trees and shrubs, but also thrives in a warm, sunny location.

GLORY OF THE SNOW - CHIONODOXA LUCILIAE - P. 112

Chionodoxa grows in all well drained soils in sunny or semishaded places. It is therefore very suitable for use under deciduous trees, shrubs and hedges.

WOOD ANEMONE - ANEMONE NEMOROSA - P. 111

Anemone nemorosa feels at home in a shady and humid place. This ground covering variety must be planted immediately upon arrival.

HOLLOW ROOT - CORYDALIS CAVA - P. 119

Corydalis cava prefers full shade between trees or shrubs, in a humus-rich soil containing moisture. Corydalis cava will produce full ground cover under the right conditions.

WOODLAND TULIP - TULIPA SYLVESTRIS - P. 100

Tulipa sylvestris likes a moist, nutrient-rich location in full sun. It grows well in grass and in light shade.

SNAKE'S HEAD FRITILLARY - FRITILLARIA MELEAGRIS - P. 113

Fritillaria meleagris or 'snake's head fritillary' needs a moist, moderately nutrient-rich soil. They also feel most comfortable in light shade.

Naturalising bulbs

CROCUS TOMMASINIANUS - P. 107

This crocus prefers a sunny spot or under deciduous shrubs. The crocus feels at home in almost all soil types as long as they are not too wet for too long.

POET'S NARCISSUS - NARCISSUS POETICUS (VAR. RECURVUS) - P. 103

This is a beautiful late flowering, narcissus. Single, slightly scented flowers. Likes humus-rich soil and a sunny to semi-shaded location.

ENGLISH BLUEBELL - HYACINTHOIDES NON-SCRIPTA - P. 114

English Bluebells prefer a light shade in a moderately dry to moderately moist soil.

DOG'S TOOTH VIOLET - ERYTHRONIUM PAGODA - P. 119

Erythronium pagoda has beautiful flowers and attractive light mottled leaves. This variety thrives in a sandy humus-rich soil in shade to partial shade.

SIBERIAN SQUILL - SCILLA SIBERICA - P. 118

These scillas attract many bees. Plant them in a sunny to semi-shaded place in well-drained soil. Scillas propagate quickly through bulbets as well as seeds.

SUMMER SNOWFLAKE - LEUCOJUM AESTIVUM - P. 116

The name 'Summer Snowflake' is misleading, it flowers already in April / May. They grow well in a moist soil and are therefore suitable for use in clay or loamy soil.

Naturalising bulbs

WILD GARLIC - ALLIUM URSINUM - P. 111

'Wild Garlic' prefers a sunny or semi-shady spot in moist, calcareous soil. This allium produces a strong garlic-like smell during the flowering. Plant bulbs immediately upon arrival.

NAKED LADY - COLCHICUM AUTUMNALE - P. 108

Colchicums mainly grow in woodland and in wet meadows. They love a sunny to partial shaded place. They can also be used for indoor flowering, without soil or water.

DROOPING STAR OF BETHLEHEM - ORNITHOGALUM NUTANS - P. 118

Ornithogalum nutans has broad leaves and prefers a sunny to semi-shaded location. The 'Drooping Star-of-Bethlehem' prefers a moist, limy soil.

ARUM ITALICUM - P. 119

Arum italicum performs best in damp soil in shade or semi-shade and can easily be combined with ferns, ivy and hostas. The red-orange berries appear in August.

STAR OF BETHLEHEM - ORNITHOGALUM UMBELLATUM - P. 118

'Star-of-Bethlehem' likes a sunny to slightly shaded place on moderately moist and moderately nutrient-rich soil.

WINTER ACONITE - ERANTHIS CILICICA - P. 119

The winter aconite is one of the earliest flowering bulbs. Eranthis cilicica does well under deciduous trees and shrubs.

Naturalising bulbs

TURKISH GLORY OF THE SNOW - CHIONODOXA SARDENSIS - P. 112

Chionodoxa grows in all well drained soils in sunny or semishaded places. It is therefore very suitable for use under deciduous trees, shrubs and hedges.

SPRING SNOWFLAKE - LEUCOJUM VERNUM - P. 116

The real spring bell. It flowers in April/ May and can be used well in moist soil and is therefore excellent for use in clay or loamy soil.

YELLOW WOOD ANEMONE - ANEMONE RANUNCULOIDES - P. 111

The yellow wood anemone feels at home in a shady and moist place. This ground cover should be planted immediately upon receipt.

EASTERN ANEMONE - ANEMONE BLANDA - P. 111

The eastern anemone feels at home in a semi-shaded place. For best results, this ground cover should be soaked in water for a few hours before planting.

SCILLA MISCHTSCHENKOANA - P. 118

Very early flowering scilla. Plant them in a sunny to semi-shaded position in well-drained soil. The scilla multiplies rapidly by means of the bulb and by seed.

ALPINE SQUILL - SCILLA BIFOLIA - P. 118

These scillas attract many bees. Plant them in a sunny to semi-shaded place in well-drained soil. Scillas propagate quickly through bulblets as well as seeds.

Mixture Breda

Verges and grass areas

MAINTENANCE FRIENDLY BULBS FOR ROAD SIDES AND GRASS AREAS

Are you looking for easy, manageable mixtures which will come back year upon year? Simply look in the section 'Verges and grass areas'. Here you will also find the bee and butterfly mixtures.

Some of our mixtures just flower in the early Spring, whilst others start early and flower until the end of June! Depending on your mowing regime, you can choose the most suitable mixtures.

Mixtures for verges and grass areas

MIXTURE EMMEN

Fragrant, cheerful and striking mixture of botanical narcissi and several types of hyacinths.

3-4

20-25 cm

100/m²

6 >

MIXTURE GOUDA

A sunny mixture with scillas, muscaris, botanical daffodils, botanical tulips and fritillaria.

3-5

15-30 cm

250/m²

7 >

MIXTURE MAASTRICHT

A nice and very colourful mixture of specie and large flowering Dutch crocuses. Combining these two types results in an extra long flowering time.

2-3

10-15 cm

250/m²

5 >

NATURALISING MIXTURE LEIDEN (IN 2 FLOWERING PERIODS)

A beautiful mixture of many miscellaneous naturalising bulbs.

A perfect naturalising mixture for woodland areas.

2 - 5

10-25 cm

300/m²

7 >

Mixtures for verges and grass areas

MIXTURE KOPENHAGEN

Botanical narcissi Golden Echo combined with botanical tulips and muscari.

4-5

15-40 cm

200/m²

7 >

MIXTURE NIJMEGEN (IN 2 FLOWERING PERIODS)

A truly special combination of Autumnflowering crocuses and Springflowering crocuses, which surprises you twice per year.

2-3 / 9-10

10-15 cm

300/m²

5 >

Flow. period 1, February - March

Flow. period 2, October - November

MIXTURE HAARLEM

Large flowering Dutch crocuses in shades of blue and white are very suitable for early perennial flowering in lawns and other grass areas.

MIXTURE BRUGGE

A fragrant mixture with hyacinths, anemone, muscari, chionodoxa and various botanical tulips and narcissi.

MIXTURE EIKENHORST

This mixture of blues and lilacs, flowers early in Spring.

It is a combination of various miscellaneous bulbs and specie tulips.

Mixtures for verges and grass areas

MIXTURE NOORDWIJK

An early flowering mixture of large flowering Dutch crocuses in yellow, blue, white and purple.

2-3

10-15 cm

200/m²

5 >

MIXTURE VEENENDAAL (IN 2 FLOWERING PERIODS)

A bee attracting mixture in two phases. In February–March the rich flowering purple specie crocus, followed in March–April by a blue–red mixture of specie tulips and muscaris.

2-4

10-25 cm

350/m²

6 >

OAK PROCESSIONARY MOTH (OPM) MIXTURE

Based on the results of our research, we have developed a special bulb mixture that attracts the natural enemies of the oak processionary moth, such as parasitic flies, parasitic wasps, beetles, green lacewings etc.

		
2-5	10-30 cm	
		
350/m ²	6 >	

MIXTURE HOUTEN (IN 2 FLOWERING PERIODS)

A natural mixture of early crocuses, followed by various specie tulips, botanical narcissi, muscari and snakes head fritillaries.

		
2 - 5	30-40 cm	
		
300/m ²	7 >	

Flow. period 1, February - March

Flow. period 2, March - May

Mixtures for verges and grass areas

MIXTURE SNEEK

Mixture of the beautiful blue-flowering camassias with various botanical narcissi.

MIXTURE OSLO

Beautiful mixture with, among other things, early flowering botanical tulips, botanical narcissi and muscaris.

MIXTURE LISSE

This stunning mixture of specie crocuses guarantees an abundant colour effect in very early Spring.

MIXTURE HUIZEN

A very natural mixture of good naturalisers. Corydalis, scillas and chionodoxa form a fascinating colour combination together.

MIXTURE TYNAARLO (IN 2 FLOWERING PERIODS)

A mixture with a wide variety of bulb types for a long flowering period. Crocuses, chionodoxas, botanical narcissi, puschkinia and specie tulips.

Flow. period 1, February - March

Flow. period 2, March - April

Mixtures for verges and grass areas

MIXTURE LELYSTAD

A nice mixture of anemones, botanical narcissi, botanical tulips, muscari and chionodoxa.

3-5

10-25 cm

330/m²

6>

MIXTURE OXFORD (IN 2 FLOWERING PERIODS)

This mixture is a surprising combination of early mixed crocuses followed by botanical narcissi, muscaris and bright red tulips.

2-5

10-30 cm

350/m²

6>

Flow. period 1, February - March

Flow. period 2, March - May

MIXTURE MIDDELBURG

This mixture of botanical narcissi offers a beautiful variation of colour, shape and flowering time.

It even includes some deliciously scented varieties.

BEE MIXTURE BREDA (IN 2 FLOWERING PERIODS)

A bee attracting mixture in two phases. In February-March a flood of yellow and soft lilac specie crocuses, followed in March-April by a colourful mixture of specie tulips, muscari and anemones.

Mixtures for verges and grass areas

MIXTURE BRUSSEL

This very colourful mixture of various tulips and daffodils is ideal for main roads and large grass areas.

2-4

25-50 cm

130/m²

6>

MIXTURE LEERDAM (IN 2 FLOWERING PERIODS)

Flow. period 1, February - March

Varied mixture of early crocuses, followed by muscari, various species tulips and white narcissi.

2-5

10-30 cm

330/m²

6>

Flow. period 2, March - May

MIXTURE ROTTERDAM

A beautiful mixture of yellow narcissi and daffodils with an extended flowering period. It includes early small narcissi and the taller daffodils will flower until the end of April.

		
2-4	30-50 cm	
		
100/m ²	6 >	

MIXTURE MOERDIJK (IN 2 FLOWERING PERIODS)

A mixture starting with abundantly flowering crocuses, botanical tulips and botanical narcissi, followed by alliums and camassias.

		
2-6	10-80 cm	
		
200/m ²	7 >	

Flow. period 1, February - April

Flow. period 2, May - June

Mixtures for verges and grass areas

MIXTURE FLORIADE (IN 3 FLOWERING PERIODS)

Flow. period 1, February - March

This mixture was a great success at the main entrance of Floriade 2012 in Venlo in the Netherlands. From early Spring until summer you will enjoy the great diversity of flowers in this mixture.

2-6

30-90 cm

120/m²

7>

Flow. period 2, March - April

Flow. period 3, May - June

MIXTURE AMSTERDAM

A well-balanced mixture of many types of large flowering daffodils in different forms, colours and shapes.

MIXTURE EDE (IN 2 FLOWERING PERIODS)

A surprisingly simple mixture with two colour periods. A bright yellow start in March, followed by pure white in April-May.

Flow. period **1**, March - April

Flow. period **2**, April - May

Mixtures for verges and grass areas

MIXTURE APELDOORN

A colourful mixture of botanical narcissi, with a contrasting addition of two tulip varieties.

MIXTURE SUN VALLEY

This cheerful early flowering mixture is a wonderful combination of 3 types of flower bulbs: botanical narcissi, crocuses and early tulips.

MIXTURE ZWOLLE

This mixture in pure white is an elegant combination of white crocuses, white chionodoxas, white scillas, white narcissi and white tulips.

MIXTURE LIVERPOOL

Cheerful flowering Spring mixture with various types of daffodils, narcissi and striking red tulips.

		
3-4	25-50 cm	
		
130/m ²	6 >	

MIXTURE VOLENDAM (IN 2 FLOWERING PERIODS)

Mixture Volendam is very suitable for road verges with rough vegetation, with its early and late yellow daffodils, followed by alliums and camassias as an extra surprise.

		
2-6	40-90 cm	
		
105/m ²	7 >	

Flow. period 1, February - April

Flow. period 2, May - June

Mixtures for verges and grass areas

MIXTURE HELSINKI

Intense blue and fragrant hyacinths in combination with various botanical narcissi and a botanical tulip in March - April.

MIXTURE KENT (IN 2 FLOWERING PERIODS)

Colourful mixture with various narcissi and tulips in March / April, followed in May / June by camassias and alliums.

MIXTURE BRIGHTON (IN 3 FLOWERING PERIODS)

Flow. period **1**, March - April

Three different colours in one mixture. Yellow narcissi start off the show in March, followed by white narcissi and finishing with camassias in various shades of blue.

Flow. period **3**, May - June

Mixtures for verges and grass areas

MIXTURE MANCHESTER

A late Spring flowering colour sensation for verges and grass areas. A mixture of various alliums, camassias and narcissi.

5-6

50-100 cm

80/m²

7 >

MIXTURE EINDHOVEN (IN 2 FLOWERING PERIODS)

This mixture is especially designed for road verges with rough vegetation. The flowering period starts with yellow daffodils, followed by fragrant narcissi in late-April. In May/June the alliums deliver a purple finish in the tall grass.

2-6

30-80 cm

100/m²

7 >

MIXTURE VENLO

Create a colour sensation in roadsides and grass areas with this intriguing mixture! Impressive blooms on start to flower in late-Spring. Flower heads of light and deep purple, along with creamy white, last for weeks, followed by the decorative seed heads.

5-6

80-90 cm

60/m²

7>

BUTTERFLY MIXTURE ALKMAAR (IN 2 FLOWERING PERIODS)

Flow. period 1, May - June

Butterflies are an important link in the food chain and furthermore pollinate flowers when they visit them to suck up the nectar. Butterflies have high standards for their habitat and will only appear in places where the conditions are right. By planting this special mixture, butterflies get attracted in late Spring.

5-7

60-90 cm

150/m²

Eye-catcher Velvet

Eye-catchers

BULBS FOR SPECIAL PLACES IN PUBLIC SPACE

Are you looking for a striking bulb mixture for a special location, to celebrate a specific event or to emphasise an important location? Visit this category 'Eye-catchers'!

These mixtures are also very suitable for containers and roundabouts. We have selected them by colour, height and flowering time.

On this photo the JUB Holland borders at Keukenhof 2023

Eye-catcher 'Velvet'
Design: Carien van Boxtel
Flowering period: early March till mid May

JUB Keukenhof eye-catchers

The colourful and long-flowering mixtures that have been planted in the JUB Holland borders at Keukenhof since 2019 were designed by Carien van Boxtel, designer at JUB. These mixtures are not only beautiful but also very special. They start flowering around mid-March and continue to bloom until mid-May. These special mixtures can be ordered from us: **'NUDE & WHITE'** (2019), **'NUDE & DARK'** (2019), **'HOT & COLD'** (2020) **'WILD GARDEN'** (2021), **'SILK'** (2022) and **'VELVET'** (2023). **Please note: these exclusive mixtures are limited available!**

'NUDE & WHITE' 2019

The JUB borders designed by Carien van Boxtel in 2019 were 'Nude & Dark' and 'Nude & White': A very dramatic dark border next to a fresh white-green border, both with salmon and 'nude' coloured accents.

'NUDE & DARK' 2019

'HOT & COLD' 2020

Carien was inspired by colour temperatures and made a choice between 'hot colours': warm red, brown and orange and also 'cool colours': powdery mauve, lilac and lavender pink that have been used interchangeably. The exuberant flowering started in late March, early April with various types of tulips, Fritillaria raddeana, muscari, chionodoxa and, daffodils. Flowering continued with a festive explosion of colour in April with Fritillaria aurora, various daffodils, many tulip varieties and various smaller spring bloomers. The result was astonishing.

'WILD GARDEN' 2021

Carien's design for 'Wild Garden' was an ode to William A. Robinson, (1838 - 1935) an Irish gardener who was at the origin of the concept of the 'Cottage Garden'. He started planting mixed flower borders in a more casual way as a counterpart to the stiff Victorian 'bedding'. He was a great advocate of the use of naturalising bulbs. This style made an important contribution to biodiversity, because commonly used species provide nectar and pollen to (early) bee and butterfly species.

JUB Keukenhof eye-catchers

'SILK' 2022

A design based on the beautiful colours of an embroidered silk dress of Queen Maxima. Soft antique faded colours such as apricot, lilac, soft pink and white tones and regal purple, designed by Jan Taminiau. A wonderful mixture. Can be ordered for the coming planting season.

'VELVET' 2023

Carpets, woven in the most fantastic repeating patterns based on flowers and floral motifs and rich, saturated color schemes, formed the inspiration for the presentation of JUB Holland in Keukenhof 2023. Saturated colours of burgundy red, black, purple, bronze, ocher, warm orange and brown were chosen, with contrast colours/accents of warm yellow and cream. Can be ordered now for next planting season.

Eye-catchers - early flowering

EARLY BIRDS

An early-flowering, high-contrast combination. White large-flowered crocuses with bright red crocus-like short tulips. A nice fresh start to the spring season.

3-4

15-25 cm

200/m²

ROYAL PRINCES

3-coloured mixture of single early tulips. Identical in shape but different in colour. Compact growth. A favourite mixture every year at Keukenhof.

3-4

30-35 cm

100/m²

PROMISE OF SPRING

A fresh early-flowering combination. Short pink with white kaufmanniana tulips mingled with purple/white striped and purple and lilac large-flowered crocuses.

2-4

10-20 cm

200/m²

IMPERIAL FRIENDS

A favourite among our eye-catchers. A cheerful mixture of orange, yellow and white. Stately large-flowered fosteriana tulips.

3-4

35-40 cm

100/m²

HAVE PLEASANT DREAMS

A winner with scent and colour. Several hyacinth varieties, beautiful salmon-coloured greigii tulips and subtle bicoloured blue grape hyacinths.

3-4

35-40 cm

100/m²

IRRESISTIBLE FRAGRANCE

The scent of spring awaits you. Beautiful combination of many hyacinth varieties. Indispensable in spring borders and flower beds.

3-4

25-35 cm

50/m²

Eye-catchers - mid flowering

LUXURY

Combination of two beautiful bicoloured tulip varieties in lilac, pink and white tones.

4-5

45 cm

100/m²

PURPLE DETAILS

Striking purple and white lily-flowered tulips in harmony with various yellow and white narcissi. Fragrant combination.

4-5

30-55 cm

100/m²

BRIGHT SIDE

A classic. A favourite mixture in our range for many years. A simple but exuberant combination of tulips and narcissi in yellow, orange and white.

4-5

35-40 cm

100/m²

PALETTE OF SPRING

A striking yet subdued combination of lily-flowering tulips with richly flowering narcissi and bicoloured grape hyacinths in the base.

4-5

15-55 cm

150/m²

FESTIVAL OF COLOURS

The name says it all. A feast of colour. Many types of tulips and various hyacinths for scent and colour.

4-5

25-55 cm

100/m²

PEACEFUL PASTELS

A gentle pastel mix of various double tulips. A subdued mix for an impressive display in the spring border.

4-5

40-45 cm

100/m²

Eye-catchers - mid flowering

AMORE

Pink represents love. A striking combination of 3 beautiful tulip varieties. Stunning in combination with e.g. blue grape hyacinths, but also in a border among early-sprouting perennials.

4-5

35-40 cm

100/m²

DAILY NEWS

A classic in our eye-catcher range. A daring combination and therefore striking in large flower beds or perennial borders.

4-5

45-50 cm

100/m²

ALL COLOURS

The name is clear, a cheerful and festive mixture of tulips in all colours.

4-5

45-55 cm

100/m²

FOXTROT PARTY

A combination of 3 double early tulips with orange, salmon, pink and red colours. A special and daring mix.

4-5

30-35 cm

100/m²

MOONDANCE

The 'black' tulip in this mixture makes it a colourful combination with a twist. Only tulips

4-5

35-45 cm

100/m²

SUNSHINE

One of the combinations with the yellow crown imperial. High-contrast tulip varieties that reinforce each other with playful and fragrant narcissi in between.

4-5

35-80 cm

100/m²

Eye-catchers - mid flowering

PINK REVELATION

The fragrant white and pink hyacinths form the basis of this mainly pink and red bulb mixture.

PAINTERS CHOICE

One of our most special eye-catchers. Flowers that could come straight off a 17th century painting. Mostly bicoloured tulips and, among others, crown imperials.

LET'S DANCE

A flashy combination with striking colours with a basic 'dance floor' of blue grape hyacinths.

PURPLISH

MASSIVE SPRING

YELLOW FRESH AND A TOUCH OF PINK

Eye-catchers - mid flowering

PURPLE BLING

A combination of not too tall single early 'Prince' tulips.

Striking and compact.

4

35-40 cm

100/m²

FLAMING BEAUTY MIX

A mix of exclusively bicoloured tulips. Special and striking. Tulips that resemble the 'historical' Rembrandt tulips. An expressive mix that will draw a lot of attention.

4-5

35-45 cm

100/m²

SPRING PEONIES

Double late tulips that resemble peonies. Pastel colours make this combination applicable everywhere. Plant large numbers for the best results.

4-5

45-50 cm

100/m²

FOSTERIANA BEAUTIES

Fosteriana, a group of tulips with a fairly early-flowering and large flowers. This combination consists of 3 beautiful members of the group. Special and striking.

3-4

35-40 cm

100/m²

HARMONY OF PURPLES

Another beautiful combination with purple as the main colour. 3 types of triumph tulips that match each other perfectly.

4-5

45-50 cm

100/m²

VIBRANT SUNSET

A combination of 4 double tulips. Strong in colour and therefore striking. For a spot in a planting bed that will receive the necessary attention. A floral sunset.

4-5

30-40 cm

100/m²

Eye-catchers - mid flowering

ENERGY

The yellow and orange narcissi play an important role in this combination and form the basis of a captivating mix of yellow, orange and pink.

4-5

50-80 cm

100/m²

SUN FEVER

Vibrant colour combination of three large-flowered Darwin hybrid tulips. For sunny locations that receive full attention.

4-5

50-55 cm

100/m²

DELICATE CONTRASTS

An almost romantic combination of blue grape hyacinths with light pink botanical tulips. A combination that can be applied anywhere.

4-5

15-20 cm

100/m²

PASSION

Cheerful colour combination of various spring bulbs. Fragrant hyacinths, impressive crown imperials and many types of tulips. So tempting...

4-5

15-90 cm

120/m²

HAPPY FRIDAY

A 'no nonsense' combination of (pink) red, white and yellow. Cheerful colours to start the weekend. Lots of tulips and some playful yellow daffodils.

3-5

20-55 cm

60/m²

WINING AND DINING

The colours of this combination give the impression of many types of wine. Red, rosé and sparkling white. A mixture that will fit perfectly in, for example, a restaurant garden.

4-5

30-60 cm

100/m²

Eye-catchers - mid flowering

SWEET DREAMS

An impressive combination of pink, white and green. A soothing pastel mix that fits beautifully in borders or public gardens.

4-5

25-55 cm

100/m²

DANCING TULIPS

Simple but so beautiful. Various Triumph tulips in white and pink with blue grape hyacinths as a background.

4-5

15-55 cm

150/m²

HEAVENLY SOFT

So many beautiful species together in a striking combination of pink, white, orange and salmon. A rich mix with a peaceful appearance.

3-5

35-45 cm

100/m²

FRESH SPRING

A combination of different types of bulbs with characteristic shapes and special colours. A standout feature is the addition of the impressive purple crown imperials.

4-5

15-90 cm

110/m²

DARING DISPLAY

Warm red and fresh white tulips, subtle white daffodils with, as extra special feature, the impressive white-green crown imperials. A bold combination.

4-5

25-80 cm

100/m²

PINK AND A TOUCH OF WHITE

A favourite eye-catcher. Various white and pink tulips. An elegant combination. Medium and high tulips, single and double flowers.

4-5

25-55 cm

100/m²

Eye-catchers - mid flowering

ELEGANT LILIES

All lily-flowered tulips are elegant. Especially this combination of white, orange and purple varieties. Their beautiful flower shape makes this mixture stand out even more.

5

50-55 cm

100/m²

MAGNIFICENT DUO

Classic blend of orange, yellow and two-tone blue. A rich combination with impressive colours.

4-5

15-30 cm

150/m²

FOXY FOXES

A combination of two double early tulips with soft yellow and pink colours. A special mix.

4-5

35-40 cm

100/m²

SMALL STUFF

Everything mini: mini tulips, mini daffodils and white grape hyacinths. A nice combination for a naturalising garden. Beautiful between trees, shrubs and herbaceous perennials.

4-5

10-25 cm

200/m²

SUNSET

A combination that is not only beautiful at the end of the day. It makes you happy. Striking orange triumph tulips with lightly scented narcissi.

4-5

40-55 cm

100/m²

PRESTIGE

Stately pink-red tulips contrast beautifully with the mix of various daffodils and smaller tulips. Contrasting but in harmony.

4-5

15-60 cm

100/m²

Eye-catchers - mid flowering

QUEENS

Special colour combination of two types of strong triumph tulips. Reddish-brown and striking pink.

4-5

45-50 cm

100/m²

CHEER YOU UP

3-coloured combination of impressive Darwin hybrid tulips. Red, yellow and purple. Striking in many ways.

4-5

55-60 cm

100/m²

REASON TO BE CHEERFUL

High-contrast red and white. 2 very short, mid-early tulips with cup-shaped flowers. Great for creating a special effect in borders or in public gardens.

4-5

25-35 cm

100/m²

ORANGE GLOW

Orange predominates in this combination. From bright to pastel. Striking combination in the spring border.

4-5 50-90 cm 100/m²

PURPLE PUNCH

Special combination of intense purple, lilac and lilac-pink colours with a touch of white for contrast.

4-5 40-50 cm 100/m²

QUIET CONTRASTS

A combination with style. Various triumph tulips in lilac, purple and salmon colours, combined with cheerful white and orange tazetta narcissi.

4-5 40-65 cm 100/m²

Eye-catchers - late flowering

FIESTA

Stately combination of several late tulips. Impressive. A (late) spring party!

5

55-60 cm

100/m²

UNEXPECTED BEAUTY

A bold combination of orange, purple and pink. A late-flowering mix with a warm appearance.

4-5

55-60 cm

60/m²

PURE & PASTEL

Pink, white and lilac. Pastel colours that glisten in the sun. As additional decorative elements, this combination also contains bee-attracting blue camassias.

4-5

45-80 cm

100/m²

FIREWORKS

Sparkling and flashy. A combination of orange lily-flowered tulips and 2 types of large-flowered yellow daffodils.

4-5

45-50 cm

100/m²

DAYLIGHT TO DUSK

Illustrious late-flowering combination of white and black tulips. A big contrast but immediately a striking appearance.

4-5

50-60 cm

100/m²

BOLD COLOURS

A combination of strong colours that stand out in late spring. A high contrast but that is why it is so special. Black, red and white and the icing on the cake: blue camassias.

4-6

25-80 cm

100/m²

Organic flower bulbs

VERIFIED AND
CERTIFIED

We obtain our organic bulbs from reliable organic growers, who do everything possible to grow their bulbs as organically and sustainably as possible. These varieties also deliver a great contribution to the welfare of bees, butterflies and other insects (biodiversity).

Planting machine

R THE SPRING

Practical info

**MECHANICAL PLANTING, FERTILISER,
MOWING, QUALITY, LOCATION
&
ALPHABETICAL INDEX,
SPECIALISTS
AND TERMS & CONDITIONS**

25 years ago, JUB Holland developed a planting machine that plants bulbs in existing lawns and roadsides, in a simple manner. In this chapter you can find information about mechanical planting as well as feeding and mowing policies.

You will also find a handy list which shows each variety with the recommended location, specific features, durability and an alphabetical index.

Mechanical planting

MECHANICAL PLANTING OF FLOWER BULBS

With our planting machines it is possible to plant large quantities of flower bulbs under grass, in open ground, along roadsides, in lawns, on roundabouts, etc. By planting the bulbs with our machine you will achieve a major reduction in labor costs. On our website you can find a lot of information about mechanical planting, how the machines work and the many possibilities. By scanning this QR code you will immediately go to the correct web pages.

The planting machine

Filling the machine with bulbs

Mixed bulbs in the machine

Bulbs on the belt before planting

Bulbs are being planted

Rollers put turf back in position

PLANT CAPACITY OF THE PLANTING MACHINE

Under the right circumstances it is possible to plant approximately 10,000 daffodils or 25,000 crocuses/small bulbs per hour.

The speed of the planting may vary depending on factors like:

- **soil type**
- **location**
- **bulb size**
- **weather circumstances**

EMBANKMENT PLANTING

Especially for sloping areas we offer a machine that can plant on banks with a maximum angle of 30 to 35 degrees. This machine is provided with caterpillar tracks, and an additional plant foot so that a uniform effect can be achieved.

Embankment planter in action

PLANTING WITH SIDE PLANTER

In order to plant closer to trees, we recently developed a side planter. This machine has a plant foot mounted on the side of the machine which enables us to plant between, or very close to, trees.

Side planter in action

Result on the bank in Spring

Result of planting with side planter

Fertilisation & mowing

FEEDING AND FERTILISATION PLAN

To preserve your bulbs, it is very important to provide them with food. It is possible to carry out feeding in Autumn and Spring with our specially selected biological bulb fertiliser. This is the same fertiliser which we use for our own cultivation at our nursery.

Autumn fertilisation

At the same time as the machine planting of flower bulbs in grass, fertilisers can be added.

Spring fertilisation

An environmentally friendly organic food can be used in Spring. The organic component in this fertilizer is converted into humus.

MOWING

When using naturalising bulbs in grass areas, a commonly accepted guideline is that mowing can be started an average of six to eight weeks after flowering.

This will allow the bulbs enough time to produce seeds and die back naturally. An exception to this rule is the allium, which can be mown directly after flowering. The foliage of most alliums has already died back before flowering.

BULBS AVAILABLE IN CRATES AND/OR NETLONS

Bulbs available in crates or netlons

Netlon packaging with type label

Processing and quality of our bulbs in pictures

Harvesting the bulbs

Every day, everyone at JUB does his or her utmost to keep the quality of the products high. The products from our own nursery, the bulbs we purchase from fellow growers and the quality of the logistics processes from purchase to sale. Everything is expertly checked.
